How to Install Presets in Lightroom 4-5
Installation is easy, just follow the steps:

Windows

1. Download the WinRAR from the link (http://www.rarlab.com/rar/wrar51b2.exe)

2. Download the presets link in the email you will receive after your purchase.

3. Extract the 364 Presets Bundle.zip in the desktop and put the presets into the folder of your choice.

4. In this folder you will find the all presets, they are the files with the .lrtemplate extension.

5. Click on the Edit Menu at the top then click on the **Preferences**.

6. There will be a new window that appears. Select the Presets tab.

7. Click on the button labeled Show Lightroom Presets Folder

8. A new folder Adobe that appears. Click on the folder named Lightroom and then click on Develop Presets. Copy the folders with your presets into the Develop Presets folder.

9. Simply restart Lightroom and that's it. Your presets can now be found in the Presets section of the Develop module of Lightroom.

Mac OS X

1. Download the WinRAR from the link (http://www.rarlab.com/rar/rarosx-5.1.1b1.tar.gz)

2. Download the presets link in the email you will receive after your purchase.

3. Extract the 364 Presets Bundle.zip in the desktop and put the presets into the folder of your choice.

4. In this folder you will find the all presets, they are the files with the .lrtemplate extension.

5. Go into Lightroom and click on **Edit** at the top and then click on **Preferences**.

6. There will be a new window that appears. Select the Presets tab.

7. Click on the button labeled Show Lightroom Presets Folder.

8. A new folder Adobe that appears. Click on the folder named Lightroom and then click on Develop Presets. Copy the folders with your presets into the Develop Presets folder.

9. Simply restart Lightroom and that's it. Your presets can now be found in the Presets section of the Develop module of Lightroom.

Thank you so much for the purchase
