Installation Instructions for installing BeArt Photoshop Actions

MAC & WINDOWS

1.Download and Unzip the presets.

2.Place all your actions in one folder. Keeping them in one place will make it easier to organize and locate them

3.Open Adobe Photoshop

4.Click "Actions" Under the "Window" button. A checkmark should appear next to it and an Actions window should open

5.Click the small arrow on the top, right-hand side on the Actions window

6.Select "Load Actions"

7.Locate the Action you want to use - you can only load one at a time - and click "Open"

8.Check the box of the action you want to use and hit the "Play" button on the bottom of your layers window
